

**HORIZONTAL WRAPPING SYSTEMS:
PACKAGING IN TOP FORM**

MORE THAN "JUST" PERFECTLY PACKAGED

INDIVIDUAL SOLUTIONS FOR INDIVIDUAL REQUIREMENTS

ProfileWrap® is the special combination of an extremely resilient polyethylene film with high cost and time savings during packing and unpacking. It will prevent the profiles from shifting in packaging. The FLÖTER ProfileWrap® films are an efficient alternative to stretch film and cardboard.

With this technologically innovative, single-pass system, packages with ProfileWrap® have economically overlapping of 16 – 22%. In contrast, conventional films are applied in several passes with 70 – 90% overlapping.

The advantages at a glance:

- Extremely high mechanical load
- Adheres only to itself
- High cost savings in the entire process
- No further packaging material required
- Simple unpacking at one time
- No shifting of the packaged good during transport
- Optionally available with VCI technology to protect against corrosion
- Various film strengths from 40 to 80 µm
- "Rip-stop effect" against tearing
- Individual colours and imprints possible

QUICK, BENEFICIAL, AND EFFECTIVE!

ProfileWrap® – THE WATERTIGHT SOLUTION.

- Packaging of individual products up to approx. 450 mm long.
- Complete wrapping, partial wrapping, or bundling possible.
- Securing of products to bases.
- Display packaging. Flexible and cost-efficient alternative to blister or cardboard packaging.

Semi-automatic R9

Electrical connection:	230 V – 50 Hz
Compressed air supply:	6 bar
Performance:	90 rpm (ring 40) 50 rpm (ring 90)
Film material:	Stretch film
Wrapping ring:	from 400 mm to 900 mm

Fully automatic ring

Electrical connection:	400 V – 50 Hz
Compressed air supply:	6 bar
Performance:	300 rpm (ring 40) 220 rpm (ring 60)
Film material:	Stretch film, width 125 – 250 mm
Wrapping ring:	from 400 mm to 3,200 mm

INTELLIGENT PACKAGING SOLUTIONS. SATISFIED EMPLOYEES.

FLÖTER is Germany's leader when it comes to "satisfaction at the packaging station." No wonder; we build machines the way your employees want them. Technical solutions that simplify your processes consistently.

Horizontal wrapping systems from FLÖTER are the ideal economical solution anywhere where a particularly high mechanical load is needed. Easy to load and unload, the bundles keep their form at all times. Your weather-proof film envelops the product with a watertight seal like a

cocoon – ideal for use at construction sites, for example. The individually printable packages will also provide for more on-site clarity.

Also, you will hit the bull's eye in ecological matters with the innovative horizontal wrappers from FLÖTER. We help reduce energy consumption, the amount of raw materials needed, and noise, and your employees will have the feeling that they are doing their part in protecting the environment during packaging.

WE PACK WITH EXPERIENCE. PUT US TO THE TEST.

WE UNDERSTOOD.

FLÖTER – a name that stands for true pioneering work. We were the first company to recognise in the 1990's that as modern logistics were fundamentally changing, so too were the demands in packaging.

From the beginning, FLÖTER has paved the way as online shopping gained in popularity. Ever since continuously we have been assisting our customers by providing new developments, allowing our customers to select from a

unique range of machines and films and packing station systems. For you, we always keep up with the new trends to ensure the best protection for your product, even under rapidly changing market conditions.

Furthermore, we are constantly working on taking into account cost pressure and making advances in process optimisation in the industry with solutions that set economical and ecological standards.

FLÖTER systems satisfy the mandatory statutory standards and regulations. Also, FLÖTER is ISO 9001:2008 certified and the FLÖTER environmental management system is compliant with DIN EN ISO 14001:2004.
