

**UNMANNED STRETCH WRAPPER SYSTEMS
OF THE COMPACT CLASS**

PATENTED WORLDWIDE – ONE-OF-A-KIND PERFORMANCE

A NEW GENERATION OF STRETCH WRAPPERS REVOLUTIONIZES SHIPPING.

Finally, an end to knotted film and waiting for wrapping processes. The FLÖTER Stretch Wrapper is fully automatic. The pallet is placed on a plate, and the wrapping process is started by remote control. Your distribution employee can pick up the next pallet in the meantime. By the time the employee returns, the pallet will be finished and fully wrapped. Also, the pallet will be ready for pick-up at the exact same angle as it was when it was set down.

The advantages at a glance:

- Fully automatic wrapping process with remote control
- Wraps pallets from top to bottom without sticking or knotting
- Saves up to 80% film through 310% pre-stretching
- Easy installation and operation in the smallest spaces
- Optional ultrasound sensor for black films
- Fully configurable control unit
- Applicator that allows rolls to be replaced in a matter of seconds
- Rotary plate in various diameters (up to 2,440 mm)
- The system can also be recessed into the floor.

Fully automatic LP-SWA

Performance:	Up to 40 pallets/h
Film material:	12-30 μ / 500 mm wide
Dimensions (LxWxH):	2,880x1,727x2,764
Connection:	230 V; 50 Hz
Drive:	Direct chain-drive
Maximum load:	2 tons

6100-45 / 6100-65

WHO REALLY WANTS TO BOW DOWN BEFORE PALLETS?

What you and your colleagues have long been waiting for: dropping to your knees before the pallet is finally a thing of the past! The FLÖTER SWA Stretch Wrapper revolutionises shipping – it can do what no other machine can. The pallet is placed on the plate and will be wrapped automatically. Truly unique!

The simple, intuitive operation is synchronised fully to the process flow. While you are picking up the next pallet, the current package will already be completely and fully packed – ready to pick up at the same angle as it was when it was initially set down. You do not even have to get out of the forklift anymore: everything is run by remote control, reliably and efficiently. The Stretch Wrapper can process up to 40 pallets an hour.

WE PACK WITH EXPERIENCE. PUT US TO THE TEST.

WE UNDERSTOOD.

FLÖTER – a name that stands for true pioneering work. We were the first company to recognize in the 1990's that as modern logistics were fundamentally changing, so too were the demands in packaging.

From the beginning, FLÖTER has paved the way as online shopping gained in popularity. Ever since continuously we have been assisting our customers by providing new developments, allowing our customers to select from a

unique range of machines and films and packing station systems. For you, we always keep up with the new trends to ensure the best protection for your product, even under rapidly changing market conditions.

Furthermore, we are constantly working on taking into account cost pressure and making advances in process optimisation in the industry with solutions that set economical and ecological standards.

FLÖTER systems satisfy the mandatory statutory standards and regulations. Also, FLÖTER is ISO 9001:2008 certified and the FLÖTER environmental management system is compliant with DIN EN ISO 14001:2004.
