

THE HIGH PERFORMANCE SOLUTION  
FOR MAXIMIZING OUTPUT WITH THE

## AirBoy®-Mini Packaging System

Ideal for decentralized packaging stations, AirBoy®-Mini is the first choice. This small and simple machine produces air cushion chains quickly and reliably, right at the location where they are needed.

The adjustable production speed is a great advantage. Air cushions can be produced and used right away based on demand. Savings in time that pay off.

Simple operation and a compact and robust design complete the profile of your new packaging aid.

INNOVATIVE PACKAGING SOLUTIONS  
WITH ADVANTAGES THAT PAY OFF FOR YOU

## AirBoy®-Mini

**AIRBOY®**  
www.floeter.com

### The advantages at a glance:

- Lightweight
- Easy operation with few function keys
- Roll change takes seconds
- Rolls are all very high volume
- Over 20 meters per minute (~ 200 cushions/minute)
- 20 µ film for optimum resource savings
- 100% recyclable material
- Low-maintenance and robust design
- Uses standard electric power

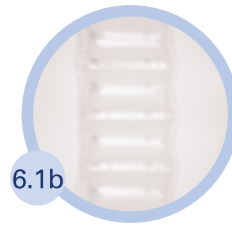

The AirBoy®-Mini system is configured as follows  
as a starter set:

**1 AirBoy®-Mini**

**4 rolls of air cushion film** (type 6.xb) of your choice, each 700 m, 20 µ

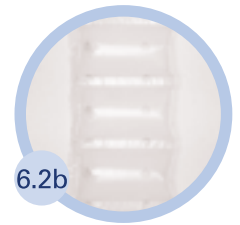

At the set price of: **EUR 1,249.--**

Please contact our consultants about special conditions for larger quantities. The prices listed are plus VAT and EUR 9.90 for shipping, for the complete set.
