

Automated AirCushion Separation. Faster. Cleaner. Smarter.

The AirWave RAPTOR turns manual void fill handling into a fast, consistent, ergonomic packing flow.

AirWave[®] RAPTOR

www.floeter.com

Automated Separation for Speed

- Separates AirCushions automatically
- Boosts throughput and eliminates manual tearing
- Delivers clean, uniform sections every time

Universal Film Compatibility

- Works with all AirWave pads, mats, sizes, and materials
- No changeovers — one machine for every format
- Perfect for high-mix, multi-SKU operations

Ergonomic, Adjustable Design

- Height-adjustable stand (optional)
- Cleaner, safer, more comfortable pack stations

Simple Touchscreen Control

- Large, intuitive display
- Quick selection of modes and section counts
- Minimal training required

AirWave Raptor automates AirCushion separation to deliver faster packing, consistent material length, and a more ergonomic, efficient workspace — fully compatible with every AirWave film.
